

## Using your new Splendide washer is easy!

WFL1300XD

### Laundry Aid Dispenser

**Chamber 1:**  
Prewash detergent\* (powder ONLY)

**Chamber 2:**  
Powder or liquid HE detergent\* (Move plastic partition to **slot A** when using liquid or store in **slot B** when using powder.)

**Chamber 3:**  
1-2 Tbsp. fabric softener

**Extra Chamber 4:**  
Bleach

### IMPORTANT!

\*Use only High Efficiency (HE) detergent in the correct dosage for your machine (1-2 TBSP of powder detergent (or liquid equiv.) per load.

**Press ON.**  
The symbols on the display will light.

**Load the drum.** Be sure the laundry has been sorted by fabric color/type and all pockets are empty.

**Load the dispenser** (See left).

**Select a wash cycle.** The optimal spin and temperature settings for that cycle will be shown on the display.

**Use buttons to customize the cycle.** Any spin and temperature settings you modify will be saved and preselected the next time this cycle is used.

**Press and HOLD the START button, release when display reads '1'.** A BEEP will indicate the cycle is accepted. **NOTE:** Your washer uses state-of-the-art safety and performance technologies. **Water will enter the drum AFTER certain load criteria have been measured and met (up to 2 minutes).**

 **To pause the cycle** tap the **START/PAUSE** button once. To un-pause, press and hold 2 seconds, then release.

 **To cancel the cycle** Press and hold the **ON/OFF** button. The cycle will stop, any water will drain, and the machine will shut off.

SEE BACK PAGE FOR 'CLEAN WASHER' AND 'WINTERIZATION' INSTRUCTIONS >>>

\*Unbalanced loads may increase wash cycle times. With two minutes remaining in the cycle: the display timer will pause and the drum will make multiple attempts to balance the load. The timer will not resume until the final spin can be reached.

# RV/MARINE WINTERIZATION

## RV/Marine Winterization Instructions

If you're currently pumping antifreeze through your fresh water system, you can follow these steps to winterize your washing machine:

1. With machine power **OFF**, advance **cycle selector knob** to '**Lightly Soiled**';
2. Press the **Power** button once.
3. Use the Temp button to select '**HOT**'.
4. **Crack the Dispenser Drawer open** enough to confirm when antifreeze enters the drawer (approx. 1");
5. Press and hold the **START button for 2 seconds, then release**. The machine will enter a short fill, then pause. Next, it will enter a longer fill, then pause again. At this point, if you've seen antifreeze enter the Dispenser, move on to Step 6. If not, press and HOLD the **Power** button once to turn power **OFF**, then repeat Steps 2 through 5;
6. **During the pause after the SECOND fill**, press and hold the **Power** button to turn power **OFF**. The machine will automatically drain the antifreeze from the drum and then turn **OFF. FINISHED**.

To Winterize Your Washer

## To Use Your Washer Again,

1. With washing machine power **OFF**, pour bleach into both **compartment '3'** AND the **extra bleach compartment '4'** of the Dispenser Drawer, filling both to their respective max. fill levels. Do not use thickened or splashless bleach as excess suds may occur;
2. Advance the cycle selector knob to the Clean Washer cycle;
3. Press the **Power** button, then press and hold the **START button for 2 seconds, then release**;
4. Allow machine to run through the complete cycle to clean out any remaining antifreeze. **FINISHED**.

To De-Winterize Your Washer

## Clean Washer Cycle

- Prior to using your washer for the first time, we recommend running an EMPTY  '**Clean Washer**' cycle.
- **Use ONLY regular liquid chlorine bleach** (not splashless, because it contains detergent). Fill both chambers '3' and '4' to max. levels.
- **IMPORTANT: NEVER USE DETERGENT IN THIS CYCLE. USING DETERGENT IN THE CLEAN WASHER CYCLE WILL DAMAGE YOUR MACHINE!!!**
